

#2.0 SWITCHBLADE NOZZLE

SKU: 165 1780-020

3.4/min @ 3200psi, 1/8" MNPT Inlet, Yellow

2.0 Yellow

#2.0

1000 - 3200PSI

3.8 - 6.8L/min

The Switchblade™ nozzle is designed and engineered for the rugged Hydro-Excavation industry. These heavy-duty, high-impact nozzles allow you to cut through dirt faster while using dramatically less water.

- **Performance** – Complete jobs faster with more runtime and less downtime. A combination of (1), (2), or (4) 0° solid stream nozzles provide greater impingement, allowing you to cut through soil faster while using dramatically less water. The Switchblade's long, linear flow path is ideally suited for trenching applications.
- **Durability** – These heavy duty, high impact nozzles are constructed with stainless steel housings and tungsten carbide wear surfaces to withstand harsh environments and provide longer life than stainless steel nozzle tips.
- **Safety** – Non-conductive urethane coating on the nozzle body protects the operator and sensitive underground utilities.
- **Flexibility** – Individual, replaceable, color-coded nozzle pills allow you to change water flow rate and pattern based on current soil conditions.
