

SS PRESSURE REGULATOR

SKU: 225 7366

Max Flow 12 gpm / 45 lpm

Min Flow 1 gpm / 3.8 lpm

Max Pressure 6000 psi

This Pressure Regulator is designed for single or multiple pump, weep or multi-nozzle systems. It is constructed of 316SS. This design easily plumbed into the discharge line or directly onto the discharge head using a tee fitting. This regulator maintains set system pressure even when only one of several guns or nozzles is performing or a solenoid valve is open, by-passing the unused flow. The pressure is held in the line during full by-pass and instantly has full pressure, when all guns and nozzle resume operation. 5-10% by-pass is necessary for optimum performance.

Technical Specifications:

• Max Flow	12 gpm / 45 lpm
• Min Flow	1 gpm / 3.8 lpm
• Max Pressure	6000 psi
• Inlet Port Size	1/2" NPT(F)
• Discharge Port Size	3/4" NPT(F)
• Accessory Type	Pressure Regulators
• Material	316 Stainless Steel
• By-Pass Port	3/4" NPT(F)
